

**GLOHRA Day 2026** is the sixth annual symposium of the German Alliance for Global Health Research (GLOHRA), intending to bring together members of the community and facilitate exchange on research and policy topics relevant to global health research.

All GLOHRA members from all disciplines and career stages are warmly invited to dedicate a day in summer to global health and connect with the community.

---

### 9:00 **Network Breakfast**

(by invitation only)

---

### 10:30 **GLOHRA General Assembly**

(members and associate members only)

The GLOHRA Secretariat reports on developments from the past year and presents a look ahead at what's next

---

### 12:00 **Lunch break & networking**

Global Health Academy Career Corner

Playersjourney Games Corner

---

### 13:30 **Ask the Community** (See the back)

---

#### **Thematic roundtables**

member-led discussions for researchers working on similar topics/themes

---

#### **Mini-methods forums**

Participants at all career levels gain a foundational understanding of methods that may be unfamiliar to them (90 min)

---

### 15:00 **Mini Methods spotlight on results**

Brief summary of group discussions

---

### 15:30 **Coffee and poster session with flash introductions to projects**

GLOHRA project teams give brief introductions to their research before transitioning into an informal poster session in the coffee break

---

### 16:30 **GLOHRA Prize: Pitching**

Selected project teams pitch their outstanding contribution to global health research or practice. GLOHRA Day attendees vote to determine prize recipients.

**Children's Well-being:** The contribution of family dynamics and mental health to children's wellbeing

**MARS:** Mosquito-based Artemisinin Resistance Surveillance in South Kivu

**PreVio:** School-based prevention of teacher and family violence: A pilot cluster randomised controlled trial in Tanzania

**ViVac:** Violence, trust and vaccine hesitancy

**PHONIC:** Public Health Operations for Climate Change Action – Development of a framework to identify priority

---

### 17:30 **Keynote**

**Co-designing community-based heat adaptation interventions in low and middle income country**

Prof. Dr. Tin Tin Su  
Director (Regional Hub for Asia Climate Change and Health - REACH), Professor of Global Public Health, School of Medicine and Health Sciences, Monash University (Malaysia Campus)

---

### 18:00 **Award of the GLOHRA Prize**

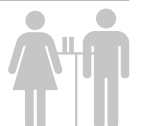

Dr. Joachim Klein, Prof. Dr. Charlotte Köhler

---

### 18:30 **Reception with food and drink**

On the terrace overlooking the Spree

20:00 Farewell

13:30 – 15:00

Ask the Community

GLOHRA DAY 2026

## Thematic Roundtables

Member-led discussions for researchers working on similar topics/themes

- 1 From Commitments to Change: How Do We Operationalize Equity in Global Health Research Partnerships?** | Luisa Wagenschwanz, Charité – Universitätsmedizin Berlin
- 2 Moving beyond ‘complex’: advancing systems thinking in global health research**  
Dr. Hanna-Tina Fischer, Charité – Universitätsmedizin Berlin; Brogan Geurts, Universität Bielefeld
- 3 Closing the Digital Inclusion Gap: Reaching the Unreached** | Annika Reinhold, Zentralinstitut für seelische Gesundheit Mannheim
- 4 Health System Adaptation to Climate Change or displacing care?** | Prof. Dr. Wilm Quentin, Universität Bayreuth
- 5 Power and Structural Inequalities in Global Health Research Partnerships** | Prof. Dr. Andreas Schultz, Universitätsklinikum Bonn
- 6 Building Concepts for High-Level Isolation Units in LMICs – One concept fits all?** | Malte Koeppen, Technische Universität Braunschweig
- 7 How the Global Health Community Can Drive Effective Advocacy** | Johann Voss, Gates Foundation  
Mara Scherner, DSW; Nina Holzhauser, DNDi
- 8 Can we enhance vaccination strategies on a global scale? From one-size-fits-all recommendations to context-sensitive, equitable and adaptive vaccine prevention** | Dr. Carolina Klett-Tammen, Helmholtz Zentrum für Infektionsforschung
- 9 Positioning basic and translational science within global health research: how can mechanistic discovery, biomarkers, diagnostics, and laboratory-based research contribute more visibly to global health impact?**  
Dr. Daniel Mutithu, BIH
- 10 Unequal Europes: health and wellbeing**  
Tereza Hendl, Universität Augsburg

## Mini-methods forums

Participants at all career levels gain a foundational understanding of methods that may be unfamiliar to them

- 11 Policy Engagement for Researchers**  
Marco Alves, Charité – Universitätsmedizin Berlin
- 12 Satellite Data and Global Health: From Environmental Measurement to Public Health Action**  
Dr. Rajini Nagrani, Leibniz-Institut für Präventionsforschung und Epidemiologie – BIPS  
Jilian Waid, PIK Potsdam
- 13 Conducting NCD cohort studies in Sub-Saharan Africa — challenges and solutions**  
Prof. Dr. Hajo Zeeb, Leibniz-Institut für Präventionsforschung und Epidemiologie – BIPS
