

Global Health Research – GLOHRA Academy Series

1. Date and place

Wednesday, 2 November 2022, 17:00-18:00 CET, online via Zoom

Please register in advance for the Zoom-meeting:

https://uni-bonn.zoom.us/meeting/register/u5AocequrzMuHd0Xeizny9ZWT41Se_u4Qnle

2. Background

The GLOHRA Academy Series directs special attention towards the added value of interdisciplinary and international cooperation in global health research. On the first Tuesday of the month, we invite speakers to share insights of his/her research projects while focusing on research processes, methods as well as lessons learned. Following the speaker's presentation, the Series encourages academic exchange between the speaker and the audience in a Q&A session.

3. Speaker

Prof. Dr. Uli Beisel is a Professor of Anthropogeography with a focus on Geographic Development Studies at FU Berlin. Her work draws together insights from Social Anthropology, Human Geography and Science and Technology Studies. She is interested in the socio-ecological aspects of health, and the conditions and possibilities of co-existence between humans and other-than-human organisms. Her PhD in human geography on malaria control in Ghana was concerned with the relations between mosquito-parasite-human interactions, the social ecologies and local biologies of malaria, and in particular the question how malaria interventions took insecticide and drug tolerance into account. She is generally interested in social ecologies of infectious diseases and their socio-political implications, health and climate change, the implementation and translation of new health technologies, as well as uneven geographies of access to health care in sub-Saharan Africa.
